SNEP NETWORK WEBINAR

Challenges and Opportunities for Green Infrastructure, Stormwater, and Resilience Funding in Rhode Island

The University of Rhode Island's MPA team interviewed over 40 public, nonprofit, and private stakeholders that are part of the green infrastructure, stormwater management, and climate resilience network in Rhode Island to learn about the challenges of financing projects in Rhode Island's municipalities. As part of their study, the research team has arrived at a number of policy recommendations that are aimed at supporting Rhode Island's municipalities.
