

Southeast New England Program Network

About the Network

The Southeast New England Program (SNEP) Network, created in 2019, consists of 15 different partner organizations with expertise in stormwater and watershed planning, management, and financing, with a focus on leadership development and climate resiliency. The Network's mission is to empower communities within the region to achieve healthy watersheds, sustainable financing, and long-term climate resilience through management of stormwater and restoration projects.

What We Do

The Network offers a full complement of **free** training and leadership development, technical assistance, and financial services. The Network works collaboratively with municipalities, organizations, and tribes within the SNEP region to build their local capacity and advance their level of practice for stormwater and watershed management.

Organizational Capacity Building

Network shares resources and lessons learned to better support the needs of SNEP communities

Community Capacity Building

Network Partners work with SNEP communities to increase their capacity to move their Stormwater and climate problems to solutions through a facilitated planning process

Regional Capacity Building

Network Partners collaborate with community stakeholders and government entities to identify common roadblocks and work together to overcome these challenges

How can my community engage with the Network?

1. Identify your community's watershed, stormwater management and financing, or climate resilience needs.

2. Fill out our online assistance form to connect with your state Network liaison: snepnetwork.org/assistance-form

3. Your Network liaison will follow up and work with you to further discuss the needs of your community.

4. Your Network liaison will recommend next steps to continue working with the Network or point to other resources and opportunities in the region. **All services provided for free.**
